“Europe Meets India at REI Expo 2025 —
Powering the Clean Energy Transition”

Why India?

India has emerged as one of the world's leading buyers in renewable energy products due to several key factors:

Ambitious National Targets

- Committed to achieving **500 GW of non-fossil energy capacity by 2030** . **Fact Check:** India Crosses 251.5 GW Non-Fossil Capacity; Achieves Over Half of 2030 Target of 500 GW : Union Minister Joshi
- Announced a target to achieve **net zero emissions by 2070** at COP26 – **Fact Check** - Nearly 20 Lakh Households (2 Million) Empowered Under PM Surya Ghar, Government target to install 10 Million residential rooftop in India
- **PM-KUSUM Scheme** has been a true game-changer for our farmers - This has reduced diesel consumption by 1.3 billion litres annually, cut 40 million tonnes of CO₂ emissions, and saved precious foreign exchange

Current Energy Landscape

- **India is the world's 3rd largest consumer of electricity and the world's 3rd largest renewable energy producer**
- Renewable power output jumped **24.4% to 134.43 billion kilowatt hours** for January–June 2025. Advantages of partnership & engagement.
- Solar PV , Wind Energy with Battery storage plants – Have become almost mandatory in all the tenders today!
- Huge Business Opportunity in C&I Sector
