The collaboration purpose is as follows one to find partners in OptecBB's network in order to take advantage of their world class and unique timing offerings this means mutually collaborative import export because they have a key component that is useful for optical communications.

For research and development their expertise with creating custom quartz crystals and patented process for scoring sections of quartz in order to create ultra precise timing oscillators is of great interest to optic BB's membership and there are opportunities via horizon funding for collaborative research that can help both entities.
