

BIOMAN^{4R2}

Success Story

FINANCIAL SUPPORT PROGRAM

*“The **BioMan4R2** program allowed us to fill a **memory test gap** in our **OPTIMIS** system, which is a **IT based psychological diagnostic tool** designed for cognitive functions, catering to neurologists, psychiatrists, and neurorehabilitators. Now, we can better respond to the needs of the healthcare market. The enhanced **OPTIMIS** system will also complement the **MDR RehaCom** neuropsychological rehabilitation system.”*

Co-funded by
the European Union

RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

„Through this project we aimed to build resilience for both our company and the regional biomanufacturing ecosystem. We have achieved this through

- **Innovating the product** itself, leading to autonomy.*
- Expanding internationally to **enhance access to global supply** and value chains.*
- Reaching out to attract economic actors, mainly SMEs, beyond Euroclusters' locations, **leveraging synergy** with other EU companies and Euroclusters.”*

IMPACT

“Thanks to BioMan4R2 we have been able to respond swiftly to market needs. Consequently, we aim to enhance our competitiveness in the Polish e-health market and expand our reach to other EU markets, particularly those within the EU-13. Additionally, we have established closer international cooperation with Prometriks in Bulgaria.”
