BIOMAN^{4R2}

RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

"The BioMan4R2 Financial Support Program has strengthened the ecosystem by fostering resilience through technological advancements. By prioritizing Artificial Intelligence, we are addressing a critical need of the modern era. These technological breakthroughs are set to drive substantial transformation within the industry, enhancing its resilience and ability to adapt to future challenges.."

IMPACT

"The financial support from BioMan4R2 and the EU was crucial for us. It allowed us to take a step that we would have strategically postponed otherwise. The importance of this decision became clear when our self-hosted physical servers reached their capacity limits due to significantly increased access from potential clients and customers."
